Exhibitor Changes:

E-Tech Management will be in booth #107
Nulife Glass has moved to booth #206

New Exhibitors:

DesertMicro
Jacksonville, Florida
800-547-7082
www.desertmicro.net

Booth # 216

Developed to meet the needs of electronic waste recyclers, DesertMicro's E-RecycleManager eases the burden of tracking each step of collection, grading and shipping. E-RecycleManager tracks collection and transport of commodities, reconciles weight discrepancies and has the option of barcode scanning and labeling for tracking. Brokerage commodities are built right in to provide real-time commodity pricing.

Fibertech, Inc.
Elberfeld, Indiana
800-304-4600
www.fibertechinc.net

Booth # 119

Fibertech, Inc. offers a complete plastics solution for material handling and storage, including custom rotational molding, repair and recycling. The company manufactures high quality, custom-engineered plastic products such as bulk containers, recycling carts and plastic lockers. The company's RC38 Recycling Carts feature the latest in work efficient design and are engineered for both storage and over-the-road transport. Also, the 2Series and 4Series bins for heavy bulk recyclables are perfect for all sorts of locations, including schools, government facilities, hospitals and waste management industries.

Global Tech Trading International
Boca Raton, Florida
305-851-5852
www.cellit2us.com

Booth #: 118

Global Tech Trading International is a global wholesale provider of mobile consumer electronics. The company operates a dynamic sourcing network and reverse logistics supply chain. Beginning with established inventory sourcing channels, Global Tech aggregates stable volumes of used devices ranging in grade. Inventory is processed through an in-house, advanced quality control and inspection process before being made available via auction or direct sale to customers around the globe.

Guidetti USA LLC
Atlanta, Georgia
770-954-8780
www.guidettiusa.com
Booth #: 814

Guidetti is an established manufacturing firm based in Italy that has a U.S. branch located in Atlanta. The company is able to provide tailored machines to process any kind of cable, radiator or waste electrical and electronic equipment, and it also provides equipment to handle aluminum cans. The company's compact machines can be manually fed or used pre-shredder to allow bulk feeding for automatic production.

JB Micro Inc.
Hayward, California
650-292-4679
www.jbmicro.com

Booth #: 715

JB Micro Inc. has been in the business of buying and selling used, recycled and access inventory computer parts for the past 13 years. Due to its access to clients globally, the company is capable of moving large volumes of items in a stipulated time, bringing more business and profits to all parties involved.

Mainstream Global
Lawrence, Massachusetts
978-682-6767
www.mainstream-global.com

Booth #121

Mainstream Global offers sustainable reverse supply chain solutions to technology organizations including computer OEMs, contract manufacturers and service providers.

Precision Grinding & Sharpening
Warsaw, Indiana
574-268-1620
www.precisiongrinding.us

Booth # 117

Precision Grinding & Sharpening specializes in manufacturing, hard-facing, re-building and sharpening industrial shredder knives for e-scrap, tire recycling and other related industries. The company's motto: "Sharpening is our specialty, not a sideline."

WhiteCanyon Software
American Fork, Utah
801-224-8900
www.whitecanyon.com

Booth #116

WhiteCanyon Software is the world leader in secure data destruction. WhiteCanyon's flagship product, WipeDrive, allows corporations and government entities to permanently and securely erase data from hard drives, removable media and mobile devices in a cost-effective, secure and socially responsible way. WipeDrive is the only NIAP EAL 4+ certified data-erasure software in the world and has been independently reviewed on a code-level basis to ensure it is secure and free from malware, backdoors or other attack vectors. WipeDrive is a comprehensive tool, erasing all drive data including HPAs, DCOs and re-mapped sectors. According to the NIAP certification report, data erased with WipeDrive is "permanently destroyed as to make any type of forensic data recovery impossible."
