

9th Annual Minnesota e-Health Summit June 13, 2013 ♦ The DoubleTree, Bloomington

"Minnesota e-Health: Optimizing, Connecting, Transforming"

CALL FOR PRESENTATIONS

Deadline: December 21, 2012

YOU HAVE IMPORTANT STORIES TO SHARE. YOUR COLLEAGUES AND COUNTERPARTS WANT TO LEARN FROM YOUR EXPERIENCES.

This year's educational Summit explores how optimizing the use of electronic health record systems (EHRs) and other health IT to connect health information is transforming health care and public health. We encourage you to partner with us by sharing your practical experience, expertise, and lessons learned. Presenters enrich the program by contributing their stories, enjoy the opportunity to network with and receive recognition from their peers, and receive a complimentary Summit registration the day of their presentation.

Please share how e-Health has enhanced optimization, created connections or transformed the way business is done in your setting. The Summit Planning Committee is specifically interested in proposals that focus on the following:

- A. **Optimizing your EHR to improve quality, safety and value** (e.g., clinical decision support, effective use, meaningful use, improving care transitions and reducing unnecessary readmissions, using EHR for quality improvement)
- B. **Connecting communities and sharing information across settings to support improved health of individuals and communities** (e.g., community collaboration across organizations, e-health collaborations and health reform, health information exchange)
- C. **Engaging consumers** (e.g., patient portals, consumer access)
- D. **Applying the Minnesota e-Health Roadmap (adopt, utilize, exchange) in a variety of settings across the continuum of care** (e.g., hospitals, clinics, long term care, dental care, public health, chiropractors, others)
- E. **Utilizing technology in an ACO/total cost of care environment** (e.g., analytics, consent, quality measurement)
- F. **Improving population and public health, data analytics and applied research** (e.g., care management, community health assessment, data aggregation, public health, research, data abstraction/report writing)
- G. **Implementing new and emerging technologies** (e.g., mobile health applications, telehealth, security of patient data)
- H. **Promoting an e-Health savvy workforce and strong organizational capacity** (e.g., workforce skills and needs evaluation; tips, tools & techniques for training with limited resources; creative approaches)
- I. **Ensuring patient privacy** (e.g., managing patient consent, implementing effective policies, responding to breaches)
- J. **Other important or innovative EHR/IT topics**

Summit Format: The Summit on Thursday, June 13, 2013 includes plenary sessions in the morning and a number of targeted breakout sessions in the afternoon, as well as exhibits and poster sessions. Submitters can indicate an interest in a breakout session presentation, a poster session, or either, to be presented on that day.

Options: Potential presenters may indicate a first choice and a second choice format if desired:

- **Presentation in a Breakout Session** – 20 minute presentation by a single speaker plus time for Q & A. Sessions are in 90 minute blocks and usually include three different presentations.
- **Poster Session** – a visual illustration of your topic displayed through graphics, photographs, diagrams, software and limited text on a poster board. One presenter available to discuss with interested individuals at a table during designated times.

Priority will be given to proposals that:

- Address at least one of the focus areas
- Share practical information or case studies that expand attendee awareness
- Present a story from individuals directly involved in using the system
- Enhance the geographical distribution represented in Summit sessions
- Are received by **December 21, 2012**

Additional Considerations:

The planning committee will group presentations in specific sessions and develop an overall conference program that is balanced according to session content. *Not all breakout sessions will be filled with presentations submitted via this Call for Presentations.*

Important Notes:

- **Presenters receive free registration for the day of their presentation (limited to one for each 30 minute segment). This does not apply to poster session presenters.**
- *Vendors are not eligible to be selected as presenters (due in part to restrictions for continuing education credits).*
- *All applicants will be informed in mid-February whether or not their proposal was selected.*

Summit Target Audiences:

- Minnesota leaders and professionals working in clinics, hospitals, long term care, public health, health systems, managed care, information systems and other settings
- Last year's registrants included a significant number of individuals holding the following positions: Chief Clinical Officer, CIO, CEO, Clinical Informaticist, CMIO, Director/Manager of various functions (such as Operations, Medical Records, Quality Assurance), Agency Director, EHR Specialist, Executive Director, Health Information Manager, Nursing Manager, President or Vice President, Program/Project Manager, Public Health Nurse, University Professor, Student
- Anyone planning for or implementing electronic health records (EHRs) and other health information technology (HIT)
- Anyone working on exchange of health information

Anticipated attendance for the e-Health Summit is 400 to 450 individuals. Breakout sessions are expected to range from 50 to 100 attendees.

To submit your application, go to http://www.mngts.org/ehealthmn/eHealth_presentations.html

Confirmation of Receipt: A confirmation email will be sent to you. Please direct questions to Helene Johnson at 651-222-7409 x206 or hjohnson@mngts.org.
