

# North Penarth Open Space Improvements

## Cogan Recreation Ground

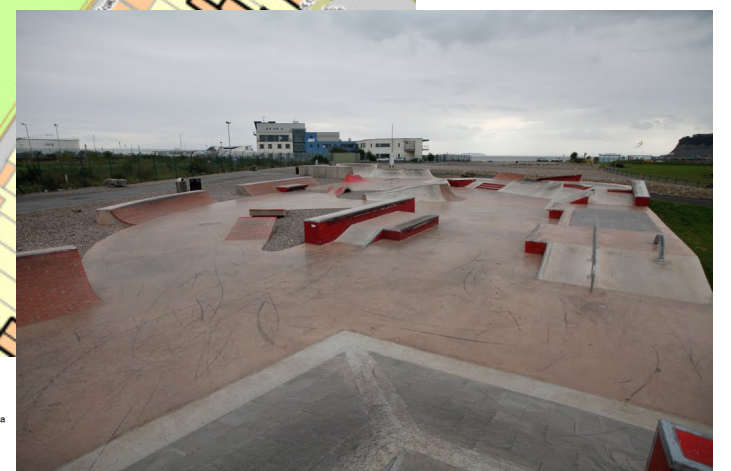

*Enhanced skate park facilities*

Views of the current Skate park which is located behind the leisure centre

Aerial photograph indicating the extent of the current skate park

Cardiff Bay skate park is a very well used facility

Examples of potential skate park design.  
Design to be undertaken with local user groups

### Notes

The existing skate park is in very poor condition and there is a great potential for this to be upgraded into a high quality facility. This could include:

- Full redesign
- Increased area and number of ramps and activities
- Concrete would be the preferred and quieter surface option
- Improved access to the facility
- Local user group involvement in design
- Lighting

Is there anything else that should be considered?
