About This Event

Rejuvenate your operation by applying lean principles in a fun and engaging way that has produced proven results. This workshop highlights the critical elements and "must know" concepts for driving effective, positive change in your organization.

Learning Objectives

Upon successful completion of this workshop, attendees will:

- ⇒ Understand the language of lean that anyone can understand
- ⇒ Learn critical thinking elements that all leaders should know in order to successfully lead people and manage processes
- ⇒ Create system thinking and understanding of how cost is related to decisions
- ⇒ Learn tools that you can immediately implement at your company to engage your workforce and instantly uncover waste
- ⇒ Develop customer and supplier measurement systems and accountability processes
- ⇒ Break down cross functional barriers for effective collaboration
- ⇒ Learn how to implement pull systems to drive material replenishment and accountability

Benefits

Take away Lean tools and best practices that you can apply directly with meaningful results. This workshop will focus on the following:

- ⇒ **Hoshin Planning:** Strategy deployment
- ⇒ **Bowling Charts & Trackers:** Are you winning? How do you know?
- ⇒ **A3:** Gets you focused on the right things to deliver results
- ⇒ **9 Block:** Identifying root cause & building an action plan
- ⇒ **Rattlesnake Hunt:** Eight waste elimination
- ⇒ **Value Stream Mapping:** Applying action to the big picture
- ⇒ **Standard Work:** Simulation and training
- ⇒ **Visual Management:** Lego layout recipe
- ⇒ **Problem-Solving Techniques:** Affinity process, fishbone diagram, and 5 Why analysis
- ⇒ **Overview of Lean applications throughout the Enterprise**

Who Should Attend

- ⇒ Executives, Managers, Engineers, Supervisors, and Team Leaders

About the Presenters

Kirk Eaton

Business Process Leader, Ingersoll Rand

After serving as Lean Deployment Leader for seven Duracell manufacturing locations, Kirk moved to Boston in 2003 and became Lean Leader / Integrated Work System Leader for Gillette/Proctor & Gamble's headquarters manufacturing plant of 2500 employees. After serving as a leader in Supplier Development for Acuity Brands in Atlanta, Kirk joined Ingersoll Rand Corporation, where he currently serves as GDP/Op Ex leader for the newly formed HVAC North America Parts Strategic Business Unit. He is part of the leadership team responsible for growing the OEM and Aftermarket parts business, as well as leveraging their strength to increase their equipment sales through existing and new channels.

Mark Preston

Founding Partner, Riverwood Associates

Mark Preston has been driving change in manufacturing and front office environments for over 25 years using continuous improvement – lean. During his 11 years with TDK Electronics, he studied Kaizen manufacturing techniques in Japan during TDK Executive Sensei training. He then invested 7 years in successively progressive executive roles within Respiroics Inc (Phillips Healthcare). In 2006, Mark became the Director of Acuity Business System at Acuity Brands Lighting, later becoming VP/Supplier Development & Operational Excellence. Currently, Mark is a lean champion for the Association for Manufacturing Excellence (AME) and serves on the AME National Board.
