At the Heart of Workplace Evolution

Welcome to Yo-Yo OFFICE® – where our mission is to inspire active working, embrace agile design, and lead the way towards a circular future.

Since 2014, we've been at the forefront of transforming how we work, championing **movement**, **flexibility**, and **health** to meet the demands of the modern workplace. Guided by science and purpose, our mission – to **#SitLess** and **#MoveMore** – drives better productivity, sharper focus, and improved mental and physical wellbeing for today's workforce.

A personal journey fuels our passion. After losing my father to a coronary heart attack at 17, I made it my mission to inspire healthier lifestyles through smarter workplace design. Supported by **Public Health England**, we commissioned the first-ever **Expert Guidelines on standing and light activity** – published in the British Journal of Sports Medicine in 2015. These standards now guide organisations worldwide: **stand or move for two hours each day** to break the risks of prolonged sitting.

Through our **Get Britain Standing®** campaign, we helped spark a national movement against sedentary working culture.

But awareness alone is not enough. Despite wider adoption of height-adjustable desks, **95%** are not used actively. That's why we created the **SMART Active Desk**, powered by the **Active Working App**, helping users set goals, track movement, and build healthier habits – across PC, phone, and smartwatch.

Creating the Future of Work

At Yo-Yo OFFICE®, we believe workspaces should evolve with the people who use them – and with the planet in mind. Our expanding collection of **pods**, **booths**, and **acoustic walls** is designed to transform static offices into flexible, energised environments that support movement, focus, collaboration, and wellbeing.

Every product is built with a circular future at its core:

- WEEE Certified and **designed for circularity**, our end-of-life program ensures zero landfill through traceable recycling and high-quality refurbishment – helping clients cut waste, extend product life, and deliver on sustainability commitments.
- Pods and Booths are **upgradable** and **reconfigurable**, designed to adapt to changing needs
- Our ultra-mobile **Yo-Yo POD®** and **Yo-Yo WALL®**, use fabric made from recycled plastic

Gavin Bradley
Founder & Chief Executive Officer
Yo-Yo OFFICE® Ltd

Health Expert recommend office workers use a Standing Desk for **2-HOURS** daily.

Only 5% of typical Standing Desk users stand for the recommended **2-HOURS** daily at their desk.

Office workers sit for an average of **10 hours per day**, with **70% of this sedentary time occurring at work**. Prolonged sitting significantly increases health risks.

For better mental and physical health, it's essential to **switch between sitting and standing every 30 minutes** to stimulate internal organs and improve blood and oxygen circulation.

Public Health England commissioned **Active Working C.I.C** to convene international experts in sedentary behavior and physical activity to assess the scientific evidence on the impact of prolonged sitting in offices. Their **2015 Expert Statement**, published in the British Journal of Sports Medicine, recommends that desk-based workers spend **2–4 hours per day standing and engaging in light movement** to reduce health risks and improve well-being.

Active Working – The Basics

Posture and Positioning

- Regular transitioning between sitting and standing
- Move every 30 minutes. Stand TWO hours during office hours
- Keep shoulders straight and neck up to maintain correct posture
- Regular movement reduces risk of muscle fatigue (and pain)

Head Position

- Neck straight, 50-70cm away from screen
- Eyes focusing on top third of screen

Wrist Position

- Wrists at elbow height or slightly below
- Elbows at right angles

Movement Improves Your Health

1. Mental Health

Regular movement activates key muscles groups, circulating blood, boosting oxygen flow and keeps internal organs active.

2. Physical Health

Every part of your body benefits from regular movement (including standing) including your brain, shoulders, back, core muscles, glutes and feet.

3. Productivity

It's simple – introducing minor movement changes into your daily routine will increase your mobility and boost your wellness.

Take frequent 'mini breaks' as opportunities to move up/down or away from your desk to help:

Activate your body

Increase your metabolic rate

Break down fats

Reduce blood sugar levels

Boost oxygen flow to your brain

On Your Feet Britain

Take part in **On Your Feet Britain®** – the national **activity** awareness day when **2 MILLION desk-based workers** across Britain participate in a variety of fun and simple activities to **#SitLess** and **#MoveMore** at work.

Taking place this year on the **Thursday 30th April 2026**.

On Your Feet Britain® is a **FREE** and **FUN** way to reboot and energize your workplace habits and is also a great team activity. This year we're looking

Research shows that regular movement throughout the day leads to

- Better physical and mental health
- Improved concentration
- Increased motivation
- And many, many more wellbeing and performance benefits

Remember it's **FREE** to sign up, www.onyourfeetday.com

Circular Responsibility

Committed to helping our partners create workspaces that are active, agile but with best-in-class sustainability credentials. Our furniture is designed to support a circular mission to minimise environmental impact throughout the lifecycle.

Recycled and Sustainable Materials

Desk frames are made from 26% recycled steel. Pod frames are made from 100% hardwood ply and water-based adhesives. Pod fabrics are made from 100% recycled materials.

Refurbishment Program

Extend Product Life. Reduce Environmental Impact.

A cost-effective, high-quality and certified refurbishment service to support your clients' sustainability targets:

- **Range of services:** powder coating, component upgrades, full motor replacements
- **Refurbished to order,** reboxed and presented as new
- **Warranty extension:** 5 to 10 years

WEEE Compliant

Responsible Recycling. End-of-life processing with full traceability – zero landfill:

- **Official WEEE disposal** using unique tracking ID
- Steel and electronics fully recyclable
- **Client reassurance:** responsibly recycled, not discarded

FSC Certification

All our desktops are made in Britain and FSC certified, an environmental label that requires that the production of wood-based products respect procedures that guarantee the sustainable management of forests.

Eco Packaging

100% cardboard ECO packaging removing plastics and polystyrene from inner packaging.

Solar Power

Our factory and warehouse are powered by electric solar panels.

Environmental Certification

DESKING

Environmental Product Declarations (EPD):

- ✓ ISO 14025

Quality Management Systems
- ✓ ISO 14001
Environmental Management Systems

Health Experts recommend office workers use a Standing Desk for **2-HOURS** daily

Only 5% of typical Standing Desk users stand for the recommended **2-HOURS** daily at their desk.

Active Desk Powered by Active Working®

- ✓ Set Goals, Heights & Timers
- ✓ Nudge Reminders
- ✓ Boost Calorie Burn
- ✓ Operates via PC, Phone or Smartwatch

SMART Active Desks

Active Desks integrate smart app features to encourage greater movement at height-adjustable desks. Compatible with PC, phone, and watch, they enhance wellness and ergonomics for a healthier work experience.

Active Working® App

Lifetime Subscription to boost usage, track performance & improve health

Move More @Work

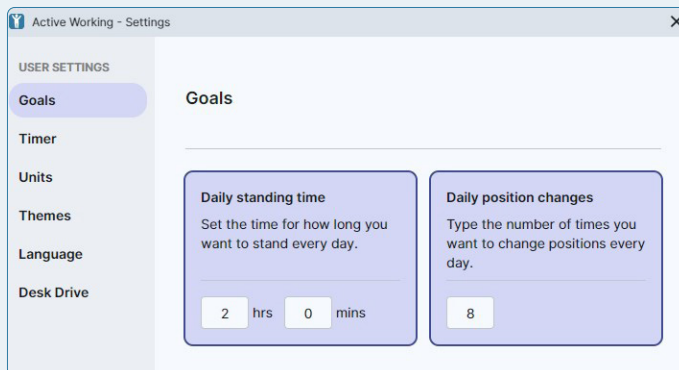

All SMART **Active Desks** come with a lifetime subscription to the **Active Working® App**:

- Set-up desk heights for sitting/standing
- Define goals and track performance (inc calorie burn)
- Set Timer prompts to remind you to “change position”

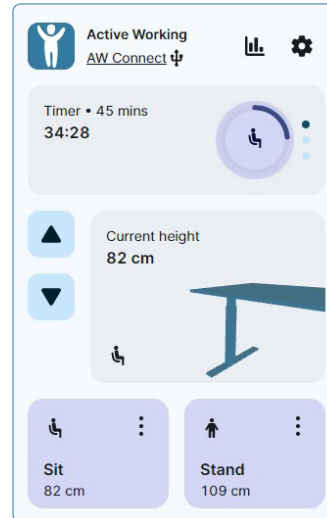

Download Active Working® App to PC, Phone and/or Watch from relevant Microsoft, Apple or Android App Stores

Set Goals

Set personal goals for both **standing time** and **position changes**. This will determine the **reminder messages** to keep you active throughout the workday, thereby improving well-being and boost productivity.

Manage Desk Heights

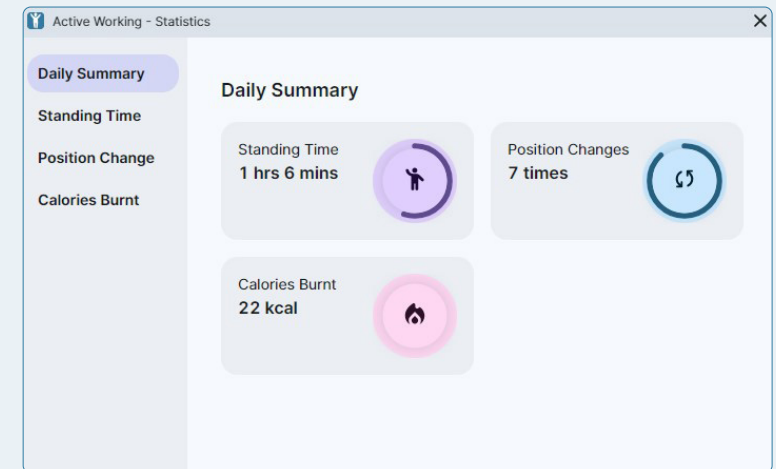

Nudges & Reminders

Track Movement & Performance

Gain insights into your daily, monthly, and annual activity with simple analytics. Improve ergonomics and health with real-time tracking of:

- Standing Hours
- Daily Position Changes
- Calories Burned

USB - A and C

Acoustics panels

Media Option

Storage box

Interchangable shelf location
laptop/writing shelf OR
remote shelf

Pull out storage drawer,
for battery when specified

Locking castors

Acoustic Only Option

Sustainable Fabrics

Whilst we can use any fabric when building your Yo-Yo POD®, we prefer to focus on those which have a genuine sustainability story.

We source most of our fabrics from **Camira**, a British company that produces fabrics globally. We hold stock of **X2**, **Quest** and **Oceanic** sustainable fabrics made from post-consumer plastic and natural fibres.

Key Benefits

Environmental Sustainability

By using post-consumer plastic waste, **Camira** is reducing the amount of plastic waste that ends up in landfills and oceans. This helps to conserve natural resources and reduce greenhouse gas emissions.

Durability

Can withstand wear and tear and are less likely to need replacing. This reduces the amount of waste generated from discarded fabrics.

Aesthetics

Available in a variety of colours and textures, allowing for customization and versatility in design.

Performance

Stain resistance, flame retardancy, and easy cleaning.

Health and Safety

Produced using non-toxic materials and processes, making them safer for people and the environment.
