

MIPS Year 6 (2022) New Quality Measures

Quality#: 481 - Intravesical Bacillus-Calmette Guerin for Non-muscle Invasive Bladder Cancer

<u>Description</u>: Percentage of patients initially diagnosed with non-muscle invasive bladder cancer and who received intravesical Bacillus-Calmette Guerin (BCG) within 6 months of bladder cancer staging.

<u>High Priority Measure</u>: Yes <u>Collection Type</u>: eCQM

Quality# 482 - Hemodialysis Vascular Access: Practitioner Level Long-term Catheter Rate

<u>Description</u>: Percentage of adult hemodialysis patient-months using a catheter continuously for three months or longer for vascular access attributable to an individual practitioner or group practice.

<u>High Priority Measure</u>: Yes Collection Type: MIPS CQMs

Quality# 483 – Person-Centered Primary Care Measure Patient Reported Outcome Performance Measure (PCPCM PRO-PM)

<u>Description</u>: The Person-Centered Primary Care Measure Patient Reported Outcome Performance Measure (PCPCM PRO-PM) uses the PCPCM PROM (a comprehensive and parsimonious set of 11 patient-reported items) to assess the broad scope of primary care. Unlike other primary care measures, the PCPCM PRO-PM measures the high value aspects of primary care based on a patient's relationship with the clinician or practice. Patients identify the PCPCM PROM as meaningful and able to communicate the quality of their care to their clinicians and/or care team. The items within the PCPCM PROM are based on the extensive stakeholder engagement and comprehensive reviews of the literature.

<u>High Priority Measure</u>: Yes <u>Collection Type</u>: MIPS CQMs

Quality# 484 - Clinician and Clinician Group Risk-standardized Hospital Admission Rates for Patients with multiple Chronic Conditions

<u>Description</u>: Annual risk-standardized rate of acute, unplanned hospital admissions among Medicare Fee-for-Service (FFS) patients aged 65 years and older with multiple chronic conditions (MCCs).

High Priority Measure: Yes

Collection Type: Administrative Claims
