our AI video guide

REDKEY PRIMED & READY FOR USE

Safely eject the device

Before using this product, you must accept the Redkey End User Licence Agreement (EULA), which forms part of our Terms of Service. Activation is a one-time process - do not attempt to successfully activate more than once. Use the Updater to check for software updates periodically. The Redkey Updater app is available in 64-bit and 32-bit versions; if you encounter issues, try the alternative version (RK_Updater_x86.exe) for compatibility.
