How Can Fiber Internet Impact Your Community?

Increased Home Values

Studies have shown that fiber optic internet availability can increase home values by 3-5%

Attract New & Younger Residents

Younger residents - specifically families with children, those working from home, and residents in high tech industries, value high speed fiber optic options in their chosen communities

Drive Economic Development

Studies have shown a correlation between economic growth and the availability of high speed fiber optic service available to residents in the community. With Wire 3 your city could be among the first 10 Gig cities in the country!

Boost Quality of Life

For many, internet has become a commodity. In that shift, certain areas have been left behind in the technological evolution. Wire 3 is dedicated to providing previously underserved communities with a **better choice** and a **better experience.**

How Can We Work Together

We're fully funded, and are not asking for any financial incentives, subsidies or other financial assistance from you. What is important to us is a welcoming community, one that can help us navigate local regulatory and permitting processes.

Local Support

We find it important to have the support of local leadership as we build our network. The right group of public and private influencers will be key to our success.

Meeting

We would like to meet with you and your colleagues to talk about how Wire 3 can work with your community. Help us meet the appropriate stakeholders, including city managers, city engineers, right of way managers, and economic development staff.
