# Airgloss for HEALTH

---

## How can Airgloss help my Company?

Hospitals and health care facilities are easily at risk of poor IEQ. Often times diseases are spread through **airborne bacteria** and a bad IAQ is responsible for causing or aggravating up to **50% of illnesses**, making environmental monitoring a top priority to consider.

**REAL-TIME EVALUATION  
OF ENVIRONMENT**

**OPTIMIZE BUDGET  
AND LOWER COSTS**

**PREVENT INFECTIONS  
FROM SPREADING**

## AIRGLOSS PROSENSE

---

HEALTH & PRODUCTIVITY

TRANSPARENT DATA HISTORY  
AND ACCESSIBLE REPORTS

OPTIMIZE ENERGY EFFICIENCY  
AND REDUCE COSTS

PROMOTE COMFORT  
AND SAFETY

PREVENT EXPOSURE TO  
INFECTIOUS DISEASES

### The problem

Hospital and healthcare facilities indoor environment is complex, and as such requires special attentions. Air conditioning doesn't only contribute to comfort, as it helps protecting patients and staff from **nosocomial infections** and **occupational diseases**. Indoor Air Quality (IAQ) plays a fundamental role, and studies have revealed that patients in a healthy environment tend to have a more **rapid physical recovery**.

Especially in common areas, **airborne bacteria**, infections and communicable diseases can spread rapidly without proper monitoring, and elders and children are the most affected by poor environmental conditions.

### Airgloss solution

**Airgloss Prosense** is the solution for indoor environmental monitoring that grants you **real-time detection** of any arising issue and total **control** over HVAC systems, alongside with **smart energy saving**.

A large scale solution for either patient rooms or waiting areas, allowing you to monitor indoor environment at all times, knowing right away when action is needed. With reports, data history and **complex building management** features for constant and trackable evaluation.
